

CHRISTOS ARGYROPOYLOS

Cloud & Infrastructure | Electrical & Computer Engineer

Athens, Greece | +30 697 627 3472 | argi.christos@gmail.com | [Christos Argyropoulos](#)

PROFILE

Electrical & Computer Engineering graduate with hands-on exposure to Microsoft Azure, cloud infrastructure and enterprise networking through internship experience, certifications, academic work and personal projects. Building a strong foundation across cloud, networking, systems and automation, with practical experience in Azure services, IP address management, Infrastructure as Code, containers, CI/CD and Cisco networking labs.

TECHNICAL SKILLS

Cloud & Infrastructure: Microsoft Azure, Azure Stack HCI, Azure App Service, Azure Container Registry, Azure Database for PostgreSQL, Terraform, Bicep

Networking: TCP/IP, IPv4 addressing & subnetting, Cisco IOS/CLI, Cisco Packet Tracer, router/interface configuration, static & dynamic routing fundamentals, routing-table analysis, ping/traceroute, basic L2/L3 troubleshooting

Automation & DevOps: Docker, GitHub Actions (CI/CD), Infrastructure as Code, health checks

Programming & Tools: Python, C, C++, MATLAB, NS2, Microsoft Windows, SSH

PROFESSIONAL EXPERIENCE

ICT Cloud Engineer Trainee - OTE Group of Companies

Jul 2024 - Sep 2024

- Gained hands-on exposure to Microsoft Azure, cloud infrastructure and enterprise networking in an ICT Cloud Engineer internship.
- Deployed and evaluated SolarWinds IPAM to centralize visibility of IP address usage across on-premises and cloud environments, monitoring address availability and status.
- Worked with Azure Stack HCI and reviewed basic Azure resource cost-optimization practices, gaining exposure to hybrid infrastructure operations.

Freelance WordPress Developer

2023 - 2024

- Designed and delivered the website for the yoga school "Omakoio Trikala", from initial wireframe through live deployment.

Military Service - Hellenic Army

Sep 2025 - Jun 2026

- Completed mandatory military service, strengthening discipline, organization, teamwork and reliability under pressure.

EDUCATION

Electrical & Computer Engineering - University of the Peloponnese

2019 - 2025

- Telecommunications & Informatics track, with academic work in networking, telecommunications and wireless communications.
- Diploma Thesis: Performance Study of 5th-Generation Wireless Networks (5G NR) using MATLAB, 5G Toolbox and network-performance metrics including SINR, BLER, throughput, spectral efficiency and fairness.

CERTIFICATIONS & TRAINING

- Microsoft Certified: Azure Administrator Associate - September 2024
- Microsoft Certified: Azure Fundamentals - July 2024
- Cisco CCNA (200-301) - In Progress; hands-on lab practice in IOS/CLI, IPv4/subnetting, router/interface configuration, routing fundamentals, routing-table analysis and connectivity troubleshooting

SELECTED PROJECTS

Private Crypto Whale Monitor | React, FastAPI, PostgreSQL, Docker, Azure, GitHub Actions

- Built and containerized a full-stack application, deployed it to Microsoft Azure using Azure Container Registry, App Service and Azure Database for PostgreSQL, and implemented automated CI/CD and health checks.

5G Wireless Network Performance Study | MATLAB, 5G Toolbox

- Designed a 5G NR simulation environment and evaluated network behavior across scenarios using SINR, BLER, throughput, spectral efficiency and fairness.

Network Simulation & Performance Analysis | NS2, TCP/IP, M/M/1

- Simulated multi-hop, dynamic-topology networks using TCP/FTP traffic and modeled M/M/1 queueing networks to analyze network loss and delay.

ADDITIONAL

Languages: Greek - Native | English - B2 (Certified)

Conferences: 13th ECE Student Conference (2022) | Emerging Tech Conference by HETiA (2023) | Patras IQ (2023)
